# EMTECH/ARTEMIS SME EVENT 2005

---

## Results of SMEs' participation: exemples

-« The embedded system event on the 29th June 2005 was exceptional: it has been the occasion for many European SMEs to present their competences to large private account and large public bodies and create cooperation on their complementarities. Evitech has met 2 potential suppliers in Grenoble and in Italy, as well as a potential customer in Spain. The SME Pact is a very good way to raise visibility of SMEs vis-à-vis large companies”.

Pierre Bernas, Director, Evitech Fr (5 persons)

-Three contracts have been signed between MBDA and Adveotec (Fr) following the participation to the EMTECH / ARTEMIS SME Event 2005
